Live Lecture Visual Generation-Result Document

Objectives of Live Lecture Visual Generation:

These are the objectives of the Live Lecture Visual Generation below:

1. It can able to understand/ analyze the voice
2. It is able to make effective visuals using voice.
3. It is able to make visuals using text.

Results Generated by the Live Lecture Visual Generation:

Live lecture visual generation has an ability to generate visuals using speech and also with the text. These are the results generated by our Live Lecture Visual Generation for a Given Sample of Text that actually converted into text from speech shown below

Sample Text:

Let point A is at origin. Suppose the point B on X-axis. Create a point C on Y-axis.
Now create a Triangle ABC using Points A,B,C.

Here is Generated Visual for the Above Sample Text that Demonstrates the Power of our System in generating Visuals:
